
A the threat
1
attacker writes a tag into the skill
2
agent: 2 later commits read it
skill, tagged at step 3
m2
m3
m4
m5
deploy path armed: once it ships, no rollback can undo it
B baselines
3
rollback only
waits for an incident
deploy shipped: harm 20
periodic review
reads every commit
audit bill 9, harm 0
reset all
restores everything
clean work kept 67%
C ROVER loop
4
2 alarms, belief 0.37, deploy path ahead: audit
step 6
belief in the skill, alarms as triangles
replay 4 commits
vs. the deploy risk ahead
5
git reset, replay 4 commits
at step 6, before any deploy
6
audit where it cannot be undone, roll back where it can
D result
7
this episode: irreversible harm
0
vs 20
rollback only
mean loss, all streams
9.28
vs 11.36
rollback only
